

# Nursery Heat Mat

The Hog Hearth Nursery Heat Mat provides the essential heat to a newly weaned piglet during its transition away from a farrowing crate into a nursery environment. Constructed with an ultra-durable, fire-rated, antimicrobial plastic enclosure the heat pad creates a warm, comfortable micro-climate for the pigs to lay down and properly acclimate to their new surroundings. Governing the temperature of the Hog Hearth Nursery Mat with the fully programmable Individual Mat Controller (IMC) ensures each pig will get the right amount of heat at the right time. The non-slip, easy-clean surface of the heat mat enclosure incorporates outer rails to help keep dry feed on the surface of the heater.

## Specifications

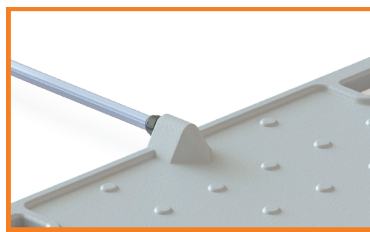

Model No.	Size	Volts	Watts	Amps
HH-NUR-120 (A)	72"(L) x 36"(W) (183cm x 91.5cm)	120	240	2
HH-NUR-208 (A)	72"(L) x 36"(W) (183cm x 91.5cm)	208	240	1.15
HH-NUR-240 (A)	72"(L) x 36"(W) (183cm x 91.5cm)	240	240	1

## Proven Advantages

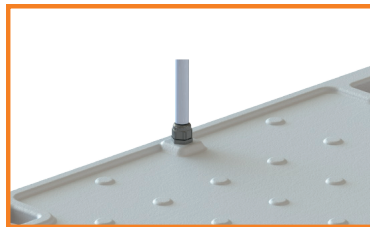

- Energy efficient low-profile heat pad Ultra-Tough, long lasting, liquid tight construction with anti-microbial medical grade plastic shell
- Fire rated 5VA enclosure
- Non-slip, easy clean surface
- Even and consistent heat
- Safe operation - no shocks - no fires
- Available in a choice of Top or Side Connect, along the long or short edge.

Individual Mat Control (IMC)
